Description

This is a combined synopsis/solicitation for commercial items prepared in accordance with the format in Federal Acquisition Regulations (FAR) Subpart 12.6, as supplemented with additional information included in this notice. This announcement constitutes the only solicitation; proposals are being requested and a written solicitation will not be issued. The solicitation, N00173-05-R-HA02, is issued as a Request for Proposal (RFP). The solicitation document and incorporated provisions and clauses are those in effect through FAC 2001- 27 and DFARS Change Notice 20050222. The associated small business size standard is 500. NRL has a requirement for a high precision Computer Numerically Controlled (CNC) vertical machining center. This will be used for the fabrication of high precision millimeter-wave vacuum electronic devices, components, and electron beam source electrodes.

Essentially, the machining center is a completely automated, computer-controlled milling machine with a 3-dimensional cutting capability, characterized by very high absolute positional accuracy, relative repeatability, rigidity and cutting speed. A wide range of rotary cutting tool types (with automatic tool changing), in conjunction with the three-dimensional programmable relative movement between the cutting tools and mounting table, allows the machining of complex structure shapes and patterns in a wide range of metallic materials that cannot be fabricated using manual milling machines.

The complete specification and/or other information required for this combined synopsis/solicitation is available at <http://heron.nrl.navy.mil/contracts/rfp/05HA02.htm>. Delivery and acceptance is at NRL, Washington, D.C. 20375, FOB Destination. Delivery shall be no later than 120 days from date of award.
